
ISOBUS CONNECT OPTION

Issue date: Mar 04, 2020

Model number(s): All Versatile tractors

Subject: ISOBUS Connect Option

Order #: 0000166M700

ABOUT THIS BULLETIN:

ISOBUS is an international communication protocol that sets the standard for agricultural electronics. The Versatile Parker monitor will connect with implements designed to meet ISOBUS standards. Versatile tractors with ISOBUS software and harness can function as a task controller and virtual terminal.

DESCRIPTION:

MODEL YEAR 2020

Tractors built after October 1, 2019 will connect to implements programmed to ISOBUS standards. The harness can be ordered as a factory-installed option.

UNITS BUILT BEFORE OCTOBER 1, 2019

Tractors featuring the 10" Parker monitor and ISOBUS harness will require the purchase of a license through Versatile Support. The license will require Versatile service personnel to visit the tractor.

Tractors featuring the 10" Parker monitor without the ISOBUS ready harness will need to purchase and install the harness; this requires the purchase of a license through Versatile Support. The license will require Versatile service personnel to visit the tractor.

Note: On units that do not have the ISOBUS harness, the dealership will be responsible for installing harness.

ISOBUS DIA kit for articulating tractors without suspended cab	86067148
ISOBUS DIA kit for articulating tractors with suspended cab	86090806
ISOBUS DIA kit for MFWD tractors	86064281

Note: 2018 and 2019 Tractors with the ISOBUS cable will still require license part number 86088909UNF.

Contact service support to order license.
