

# AES-25 Electric Steering Spare Component Parts

Topcon Precision Agriculture announces spare parts availability for the AES-25. A majority of the components are available. If the AES-25 is to be moved between machines, extra harness components can be installed and left in place, eliminating the need to reroute cables.

Harness accessories required for a second installation are AGA3819, AGA3873, AGA3821 and AGY1071. The AGA3494 CAN extension cable may not be needed depending on the machine design.

In addition, if the user does not want to move the System 150/250 AES-25 harness (connects the AGI-3 antenna to the AES-25 system), a second AGA 3901 cable should also be ordered. Care should be taken not to leave the connector end of the AGI-3 harness exposed to the weather when not being used.

NOTE: If there are problems with the steering motor itself, please contract Topcon Technical Support for diagnostic assistance.

Part Number	Description	List Price USD
1. AGA3824	Steering Wheel	\$170.00
2. AGA3825	Wheel Logo Cap	\$20.00
3. AGA3819	Junction Box Assembly	\$1,000.00
4. AGA3873	Junction Box Mounting Bracket	\$20.00
5. AGA3821	Junction Box Power Harness	\$115.00
6. AGA3494	CAN Extension (3 meters, 10ft)	\$70.00
7. AGY1071	CAN Terminator F/Male TURCK	\$56.00
